W Maya (religion) - Wikipedia

en.wikipedia.org › wiki › Maya_(religion)

13 December 2020 - But the Maya of the Vedanta, in its last developed form, is neither Idealism nor Realism, nor is it a theory. It is a simple statement of facts – what we are and what we see around us." Māyā (Sanskrit; Tibetan wyl.: sgyu) is a Buddhist term translated as **"pretense" or "deceit"** that is identified as one of the twenty subsidiary unwholesome mental factors within the Mahayana Abhidharma teachings.

In commerce we like to celebrate success. We tell tales of battles fought and victories won. We make heroes of our top performers. But how often do we stop to consider the colleagues who don't quite attain the highest levels; the collateral damage of our leaders' high standards and impossible demands; the victims of success?

SLOW NOW
WOLILSLOW

That takes the best bits of what we have now

And tries to reshape them into something that feels better

This is a handbook for those who want to help create MAYAworld, online or IRL, because they believe it can be of assistance in achieving their place and purpose

It is designed to be rewritten, reshaped, remixed

POETS I BEG OF YOU

To *paraphrase* Buddha, teach what you   learned
not what you were taught

The only rule is NO DELETING

RESIZE, ADD PERSPECTIVES, COVER UP as you think makes sense

But never ERASE ideas out of the future

To PRO(TECH)T is to…

(1) . Avoid dismal dualisms and narcissisms anachronistic, allowing our physical and digital selves to nurture each other

(2) . Refuse how platforms have been made for us, but to remember that parts of platforms still enrich and answer our lives

(3) . Utilize technologies on our own terms to create alternative visions of platforms, embracing technology as a mutual collaborator

(4) . Embrace personalization as a future-facing tool for imagining alternatives, prioritizing real values over anodyne values

(5) . Imagine alternative platforms that nurture communities, not comical

(6) . Confront how Feminine and present a more intersectional, less Feminine and ecocapitalist Feminism, that is anti-racist and prioritizes real values

(7) . (Re)claim ownership from Big Tech so that we can use our agency to act on only our own(selves)

(8) . Work towards massive individual and collective needs based on real values through collaborative dialogue and collective learning opportunities

(9) . (Re)frame attention as CARE over CONTROL, seeking to nurture, answer and form solidarity, rather than victimize

(10) . Embrace fluid boundaries that shift as need(s) evolve

MAYAworld believes Capitalism is a mental illness, and that it should be included in The Diagnostic and Statistical Manual of Mental Disorders

CONFUSION PARALYSIS - being presented with so many options that one becomes overwhelmed

CONFUSION ANXIETY - similar to above, but manifests as overstimulation, thought spirals and anxious behaviour

CONVENIENCE BIAS - feeling pressured to choose the most convenience option even though we know it is hurting the planet

Personal dreams,
       limited by society

Currently we are encouraged to
individually DREAM BIG while our
collective dreams are ACTUALLY
decided by governments and media

What about collective dreams
+ personal limits?
    In MAYAworld we dream together so
    the responsibility for making
    dreams come true is collective
    ∴ we can enjoy our limitations

Delusional girls take the first EXIT

Baby we're trying to get to a
world of ease, if it's difficult
it doesn't belong there

The older I get, the more I think the secret
of happiness is the ability to embrace the
boring, lay claim to the mundane and
rejoice in repetition. In affairs of the heart
and the wallet, in relationships and family
life, and the workplace too, we'd enjoy more
lasting success if we stopped being bored by
the boring, stopped seeking what we tell
ourselves is the next exciting thing. After
all, everything gets boring in the end if you
let it.

OG V/o: It is centered around - what I call - "delusion boards" - basically a rebrand of a moodboard or a vision board

The important difference is that we make these ones together We storyboard the delusions that we want to manifest as reality, creating a reference point from which to grow IRL cultures and movements

After all, if enough people buy into a delusion, it becomes a reality

You could totally use MAYAboards to plan outfits or creative projects, which would be great use cases
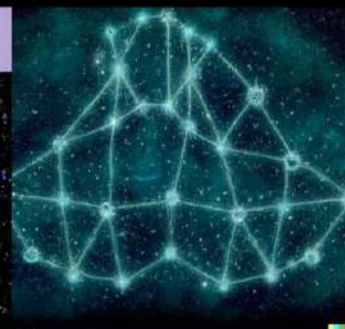

OG V/o: Imagine these boards plotted on a map
We would have detailed map of relationships
A new community-owned data set

How boards are connected would show how trends travel and the
multitude of influences on creative projects - changing the
cultural context for originality

Also, seeing boards mapped next to each other would show
which noisy internet groups are actually small in numbers,
and what the majority of us are actually like.

programmable.
I want to work equally well on iOS and Android -- We don't
need more manufactured separations

I sort of think of it as a visual Wikipedia, but with other
functions layered on top of it

How does AI play a role? I know many people are scared of AI
but imagine if the boards for topics are suggested by AI, and
we - humans - vote on whether the AI got it right or not

A new way to train AI that is much more intentional and
transparent and collaborative

OG V/o: I'm really excited about the possibility of people
just building the features they need and then selling them
to each other as plugins

I imagine that they would be sold for cheap, like 1 or 2
dollars

And let me get delusional again but if MAYAworld got to the
size where you could sell over 100k (look I worked in Silicon
Valley, these numbers are normal to me) then maybe that
feature would just become a standard

Works like capitalism is supposed to work, keeping the market
fresh for new innovation

OG V/o: The reason I love the board format is because it's visual and you can kind of see everything at a glance.

Sometimes I'm brainstorming with my friends about creative projects in WhatsApp or whatever
and it would be so cool if the reference images could be on a adjacent to the text, right so you can always keep them in view as the conversation progresses

And even though this is a loaded term, maybe there's a social network element to this
Where depending on who the board is shared with, you have different ways to communicate or take notes
